

Internet Explorer Browser

How to Disable a Proxy Server in
Internet Explorer

Step #1

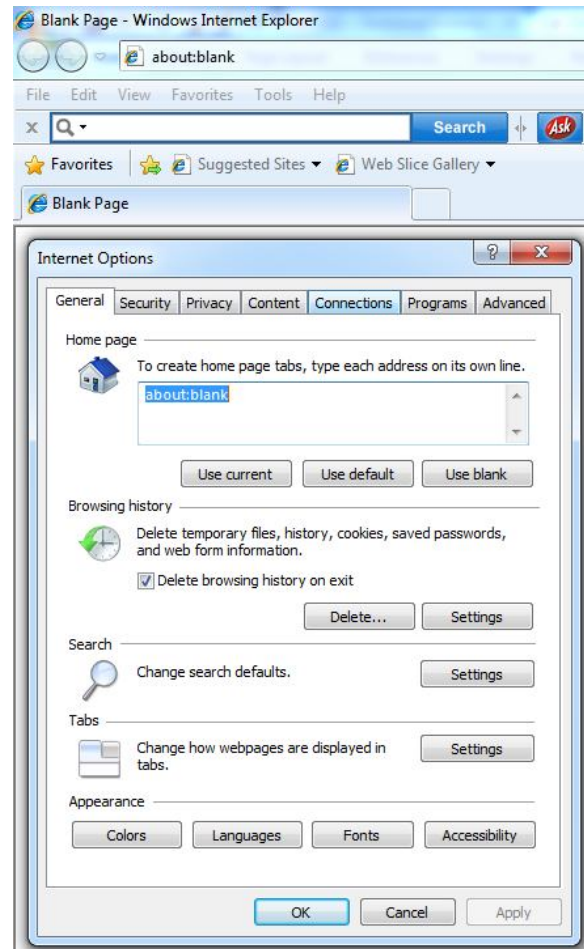

Open Internet Explorer.

Click "Internet Options."

Press the "ALT" key to open the menu bar and click on the "Tools" menu.

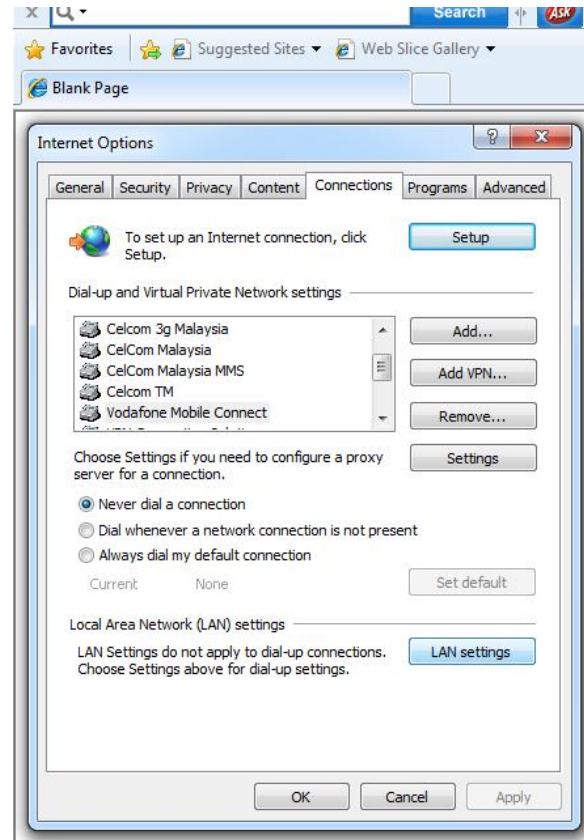

Step #2

Click on the tab labeled "Connections"

Step #3

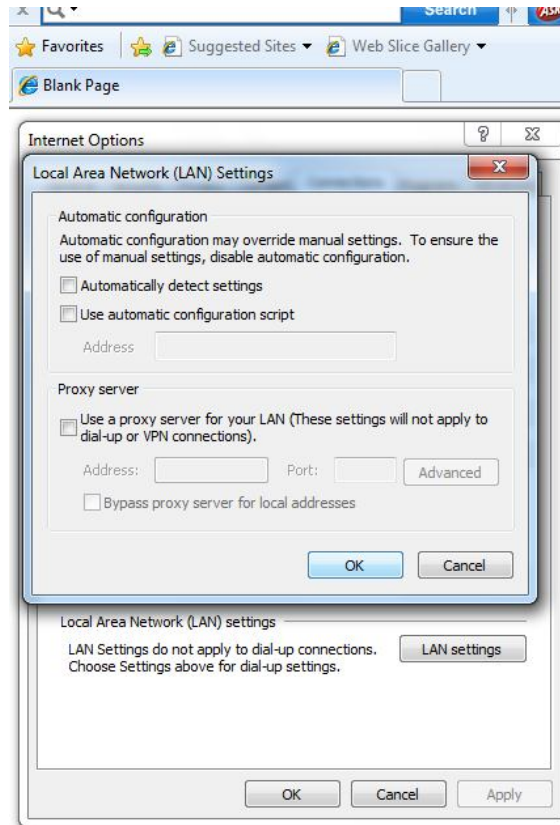

Then press the "LAN settings" button.

Step #4

Remove the check mark in the check box labeled "Use a proxy server for your LAN."

Click "OK." Internet Explorer is no longer using a proxy server.

Step #5

Done !
